**DETAILED ACTION**

***Election/Restrictions***

- Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1, 3-6, 8-15, 19-28, 30, 32, 33, 43-46 and 48-52, drawn to a method and system for controlling access to a plurality of storages using logical addresses corresponding to physical addresses, classified in class 707, subclass 10.
- II. Claims 36, 37, 39 and 40, drawn to a system for setting an amount of fee in response to purchase information using content ID, classified in class 705, subclass 402.

- The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is drawn to a method and system for controlling access to a plurality of storages using logical addresses corresponding to physical addresses, Group II is drawn to a system for setting an amount of fee in response to purchase information using content ID. See MPEP 806.05(d).

Art Unit: 2162

- Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
  
- Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
  
- Applicants is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Art Unit: 2162
